

MODULE Google Translation

Version 0.4.2
Last update: 2015-06-30

FEATURES

- Translate all your website in about 60 Languages with google translation.
Work immediatly after installation

INSTALLATION

This module can be installed like any module Prestashop.

Installation of a module

Once the download is complete you can take the following steps:

- Unzip (decompress) the compressed plug
- Connect to your server using a software FTP
- Place the file **/ggltranslate** in /modules on your server.
- Connect to your shop to BackOffice
- Go to the Modules tab.
- Look for the new module in the list, scroll down if necessary.
- In line with the new module, click Install.
- Still looking for the new module. Click **Configure it for use**.

Or directly from Modules Tab in Admin Panel, click on Add Module

Moving the module (by default at the bottom of the left column)

When you install the module, it automatically turns down the left column.
If you have not left column on your site, nothing appears!

Just move the module, for example at the top of the site:

- Go into admin
- Modules menu and Positions

Delete the Google Translation module that appears in the LEFT COLUMN BLOCK

Then click on the top Transplant a Module

Choose Google Translation

In Hook Into: Choose displayTop (Top of Pages)

This module is not free

If you have this module, without having paid, please, buy it. Link below.

The price is low, so if you use it, pay it!

Why this module is not free?

Just because I spent a lot of time writing it. And I'll update it whenever it is needed.

Where can you find and update this module?
